I wanted to say what a great experience I had working with Laura to sell our home. Laura was very easy to talk to and wonderful at listening. She also was very knowledgeable about the market and forthright with information that helped me price the home so that it would sell vs. just sit idle. I felt like I was speaking to someone who was genuinely looking out for my best interests during the sale of our home. She was with me the entire process and often times would take time out of her schedule to meet people at our home when I could not make it there. She helped identify issues during the sale of our home and then provided solutions to them (for example, scheduling and arranging to meet contractors at my home).

This was an incredible help and a huge relief to me. She took care of many loose ends during the process and even followed up with me after the sale regarding things that other agents would have likely ignored or skipped altogether (for example, making sure I was properly compensated for left over propane).

To sum it up, working with Laura made what could have been a very stressful process a very positive experience for me. I would highly recommend her for any real-estate related matters.
